

The chart displays wave height in meters on the y-axis (0 to 12) against time on the x-axis (Jan 26 to Feb 05). A red vertical line at Jan 27 indicates the 'now' point. The forecast accuracy is color-coded: green for Excellent, blue for Very Good, purple for Good, yellow for Poor, red for Noise, and grey for Unknown. Wave heights show a significant peak around Jan 31 and Feb 01, reaching over 10 meters. The forecast accuracy transitions from Excellent to Poor and then to Noise as the wave height increases and the forecast period moves further into the future.

Date	Wave Height (m)	Forecast Accuracy
Mon 26-Jan	7.0	Excellent
