

The chart displays wave height (Ht) on the y-axis (0 to 14) against time on the x-axis (Tuesday 03-Feb to Friday 13-Feb). The data is represented by green bars. A red vertical line at the beginning of the series is labeled 'new'. The legend indicates forecast accuracy levels: Excellent (green), Very Good (blue), Good (purple), Poor (orange), Noise (red), and Unknown (black). The wave height fluctuates, peaking around 12 on Friday 06-Feb and 11 on Tuesday 10-Feb.
