

The chart displays wave height data over a 10-day period. The y-axis represents wave height in feet, ranging from 0 to 5. The x-axis shows dates from Thursday, February 5th to Sunday, February 15th. A legend titled 'Forecast Accuracy' defines six categories: Excellent (green), Very Good (blue), Good (purple), Poor (yellow), Noise (red), and Unknown (black). A red vertical line at the start of the data series (Feb 05) is labeled 'Noise'. The wave heights show a general upward trend, peaking around February 10-11 at approximately 3.0 feet, followed by a decline and then a sharp increase again towards the end of the period.
