

The chart displays wave height data over a 10-day period. The y-axis represents wave height in meters, ranging from 0 to 10. The x-axis shows dates from Thursday, 05-Feb to Sunday, 15-Feb. A legend indicates forecast accuracy levels: Excellent (green), Very Good (blue), Good (purple), Poor (orange), Noise (red), and Unknown (black). A red vertical line is positioned at the start of the 'Noise' period on Feb 5. The wave height shows significant variability, with a peak around Feb 7 and a general decline towards the end of the period.
