

Figure 10 is a bar chart titled 'Surface Current, kts' on the y-axis, which ranges from 0 to 0.5 in increments of 0.1. The x-axis represents 'Local Time' from Sunday, 07-Dec to Saturday, 13-Dec. A red vertical line labeled 'now' is positioned at the beginning of Sunday, 07-Dec. The chart displays blue bars representing current speeds. A dotted vertical line is located between Sunday and Monday. The current speeds are generally low, with notable peaks around 0.3 kts on Thursday, 11-Dec and Friday, 12-Dec. The bars are grouped by day, with each day having multiple bars representing different time intervals.
