

Figure 1 is a contour plot showing the surface pressure (hPa) for Proteus at 20 April 2016 06:00 UTC. The x-axis represents Longitude, E (1.5 to 5.5) and the y-axis represents Latitude (4.5 to 8.5). The plot displays pressure contours with values ranging from 1007.0 to 1008.4 hPa. A black line indicates the location of Proteus, and a small black dot marks the location of the observation.
