

The figure consists of four vertically stacked bar charts sharing a common x-axis representing time from Sunday, July 27, to Sunday, August 4, 2023. The x-axis is divided into daily segments labeled from Monday, July 28, to Saturday, August 2, with additional bars for the preceding and succeeding days.

- Surface Pressure, mb:** The top chart shows pressure values ranging from approximately 1013 to 1019 mb. The y-axis scale is from 1010 to 1020.
- Air Temperature, °C:** The second chart shows temperature values ranging from approximately 25.5 to 27.0 °C. The y-axis scale is from 25 to 27.
- Relative Humidity, %:** The third chart shows humidity values that are consistently high, mostly between 80% and 90%. The y-axis scale is from 0 to 100.
- Cloud Cover, %:** The bottom chart shows cloud cover percentages, with most days at 100%, but with notable drops to around 45% on Monday, July 28, and 60% on Friday, August 1.
