

Figure 1 displays two time series plots for the period from August 31 to September 15, 2011. The top plot shows Wind Speed in knots (kts) on the y-axis (0 to 20) against time on the x-axis. The bottom plot shows Wave Height in feet (ft) on the y-axis (0 to 7) against time on the x-axis. Both plots include a red vertical line indicating the start of the record on August 31. The x-axis is labeled with days of the week and dates. Arrows at the top of the plots indicate the direction of the wind. The wave height plot also includes a 'period, sec' label at the bottom left.
