

Figure 1 is a plot of surface current (kts) versus local time. The y-axis is labeled 'Surface Current, kts' and ranges from 0 to 0.5. The x-axis is labeled 'Local Time' and shows dates from Mon 22-Dec to Sun 28-Dec. A red vertical line marks 'now' on Tue 23-Dec. The plot shows a constant surface current of approximately 0.48 kts from Monday to Sunday, with a slight decrease on Sunday. A blue dashed line is at 0 kts.
