

The map displays the distribution of the Iberian lynx across the Iberian Peninsula. The landmasses are shown in black, and the surrounding water bodies are in white. The map is color-coded by lynx density, with yellow representing the highest density (36.8) and dark blue representing the lowest density (36.65). The distribution is concentrated in the southwestern part of the peninsula, particularly in the region of Extremadura and southwestern Spain. The map includes a scale bar from 0 to 100 km and a north arrow.
